

VALENTINE PUBLIC LIBRARY HEALTH ACTION STEPS

1. Hand Sanitizer

For all patron's hand sanitizer will be available.

2. Sick Patrons

Patrons who appear to have flu-like symptoms will be asked to please go home and return when their symptoms have dissipated. Children coming to the library after school will be asked to call their parent or guardian and will be sent home if they are exhibiting flu-like symptoms. Parents will be asked to use the same rule for the library as they use for the schools that their children should be fever free for 24 hours before sending back into the public environment.

3. Disinfectant Spray/Wipes

Library staff will wipe down all material as it is returned. Computer stations, keyboards, mice, and common-use surfaces will be wiped down with disinfectant.

4. Disinfectant Spray

Disinfectant spray will be used on all table tops following each use and the circulation desk surfaces as the needs arise. Every day, surfaces in the lobby will be wiped down, along with the front door handle and restroom door handles.
